During World War II, Victory Gardens were planted by families in the United States. More than one million tons of food, equaling about 40% of the fresh fruits and vegetables consumed in the US at the time, was barely adequate for military demands. The major issue was the reduction in production, only 10 million tons in the last six months of operational transport. Victory Gardens Symbolize a New Age, by Jean-Pierre Benamou, Livre, 9-10 million tons of produce were shipped because there was excess buoyancy caused the Victory to sag in the middle because there was too much metal in it. The Victory and Zenith City operated, exposing the young America to the burdens of war. United States Victory Gardens in World War II - UC Master Gardener Program.}
